This course explores aesthetics in its broadest sense. Specialists and general practitioners from all areas of dentistry will discuss their concepts and application of aesthetics in their particular field, from the face to the individual tooth and its periodontal support. The program will benefit all dentists who wish to maximise their aesthetic outcomes.

**FACIAL AESTHETICS IN CHILDREN**

*Associate Professor Andrew Heggie*

The establishment of treatment protocols in a multidisciplinary setting for the management of congenital and developmental deformities in children is essential for a consistent outcome with improved form and function. Unlike the adult patient, growth considerations must be incorporated into any treatment plan to enable the best timing for surgical intervention. Common conditions managed by the paediatric craniofacial team include cleft disorders, craniosynostoses, a spectrum of facial asymmetries and unusual pathologies that require sophisticated reconstructions that will be stable for the long term. This presentation will illustrate examples of these disorders and explain the systematic approach to staged management into adolescence.

Dr Andrew Heggie completed his undergraduate dental and medical degrees at The University of Melbourne. He trained in Oral and Maxillofacial Surgery in Melbourne and undertook further Fellowship experience in Seattle (University of Washington) in 1982/3. He is currently in private practice and is also A/Professor and Head of Oral and Maxillofacial Surgery at the Royal Children’s Hospital of Melbourne where he is active in the Craniofacial Unit. His main interests are the management of congenital and developmental facial deformity and this is reflected in his publications record and previous lecturing commitments.

**FACIAL AESTHETICS IN THE ADULT**

*Dr Jocelyn Shand*

The development of treatment guidelines, in a multidisciplinary setting, to enable patients to achieve an optimum facial balance together with a full functional occlusion has been well established over the past two decades. While there are different emphases and approaches to managing particular facial patterns between individual clinicians, there are generally agreed principles in orthodontic/orthognathic treatment planning with restorative/prosthodontic considerations at the forefront to ensure the best outcome. A general overview of adult facial aesthetics will be presented together with a variety of surgical approaches available to correct skeletal dysplasias. This presentation will also describe the order of treatment planning in the management of complex cases including augmentation of the jaws where dental implants are anticipated.

**LEARN HOW TO PLAN FOR OPTIMAL DENTAL AESTHETICS**

*Dr Kip Homewood*

Aesthetics plays a very important role in the successful outcome of dental treatment. Dr Homewood’s perspective on aesthetics has evolved – having trained to become an orthodontist from that of a restorative dentist with 20 years’ experience. This lecture will explore what an orthodontist looks for when treatment planning for the best treatment outcome incorporating the knowledge gained as a restorative dentist.

Dr Kip Homewood is a registered Specialist Orthodontist. He undertook his postgraduate studies after 20 years in general practice. He has been a clinical teacher at The University of Melbourne for over 25 years, an examiner for the Royal Australasian College of Dental Surgeons and for the Australian Dental Council. His interests are in general orthodontics and interdisciplinary treatments.
PERIODONTAL PLASTIC SURGERY: PERIODONTAL PROCEDURES IN THE AESTHETIC ZONE TO ENHANCE AESTHETIC OUTCOMES
Dr Adam Rosenberg
A combination of periodontal procedures can result in a beautiful new smile and improved periodontal health. On the restorative front, newer materials are available today which are more natural looking than ever before, however if the gingival framework is not designed to support these restorations, it will result in a less than ideal aesthetic outcome. The presentation will focus on periodontal and peri-implant procedures that provide the foundation for restorations to appear natural looking and aesthetically pleasing.
Dr Adam Rosenberg graduated with a BDsc from the University of Witwatersrand, Johannesburg, South Africa and obtained his Masters Degree in Periodontology from the University of North Carolina at Chapel Hill, USA. Dr Rosenberg is in full-time clinical private practice in Melbourne and is a clinical demonstrator in the postgraduate periodontal program at The University of Melbourne. He has a passionate interest in periodontal plastic surgery, Implantology and guided bone and tissue regeneration.

AESTHETICS IN PROSTHODONTICS – A STEP BY STEP PROCESS
Dr Graham Woolley
For those of us who had a science-based education, in preparation for entry to medical and dental schools, the subject of artistic composition can seem quite vague and esoteric. Nevertheless, the principles of aesthetics can be learnt and applied to dentistry in a step by step process that appeals to our analytical, scientific bias. If this process progresses from the patient’s overall expectations and facial appearance down to the individual tooth level, then patient acceptance is much more likely – even though a perfect aesthetic result may not, ultimately, be possible. Approached in this way, aesthetics can be one of the most interesting and rewarding parts of Prosthodontics.
Dr Graham Woolley is a senior lecturer in Prosthodontics at the Melbourne Dental School. He also works as a Specialist Prosthodontist for the Australian Defence Force and maintains a private practice in Geelong.

AESTHETICS – A CERAMIST VIEWPOINT
Mr John Lucas
This presentation will discuss some of the parameters necessitated to achieve a high aesthetic result with tooth-borne and implant restorative restorations. Some of these parameters include tooth morphology, surface texture, negative space and colour. Shade taking techniques and the communication of shades between technician and clinician will also be discussed. Patient expectations are often riding on the final appearance of their restorations. This presentation will be geared from a technical viewpoint to provide some guidelines to help achieve these expectations.
Mr John Lucas completed an apprenticeship in dental technology in 1983 at the Royal Dental Hospital, Melbourne. Mr Lucas has 27 years of experience in Dental Technology and has established a boutique laboratory (Intra Oral Technologies) specialising in aesthetics and complex restorative cases (tooth borne and implant). He commenced working with dental implants in 1993 and is experienced with most commercially available implant systems. He is involved in the training of dental technicians in implantology, and has lectured extensively in Australia as well as internationally. He is an International Team for Implantology Fellow and has received several craftsmanship awards from Royal Melbourne Institute of Technology.

BUILDING AN AESTHETIC RESIN COMPOSITE CROWN
Dr Terry Wong
To successfully place direct composite restorations, the dentist needs to have a sound understanding of bonding, shade determination and needs to be adept at handling, finishing and polishing the material. Furthermore, more difficult techniques in using composite to restore badly broken teeth by way of producing direct crowns can be challenging when the principles of composite placement are not well understood. This lecture will discuss these areas and attempt to equip the dentist with skills to achieve durable and aesthetic results.
Dr Terry Wong obtained his dental degree at The University of Melbourne in 1987. He maintains a general practice in Melbourne with emphasis on restorative dentistry. He has been an attendee at the Las Vegas Institute and studied occlusion at the Kois centre in Seattle. Dr Wong has been personally instructed by Newton Fahl of the Fahl School of Art and Science in Aesthetic Dentistry in Brazil. Presently he lectures at Melbourne Dental School to undergraduates on the topic of aesthetic dentistry and since 2004 has conducted hands-on programs for several dental companies.

LEARNING OBJECTIVES
At the conclusion of this lecture participants should be familiar with:
- the concepts of aesthetics as applied to the face and the oral cavity
- the treatment modalities available in various speciality areas
- aspects of integration of treatment in order to achieve an aesthetic result
REGISTRATION AND FEES
- Registrations must be received three working days prior to the event. Registrations received after this will incur an additional $25 administration fee.
- Registration fees are stated within the event information and also on the booking form.

REGISTRATION CATEGORIES
- Members: The member rate is for current members of the ADAVB and other Branches of the ADA.
- Students: The student rate applies to full-time dentistry students enrolled at either undergraduate or postgraduate level in 2011. Proof of your student status (e.g. photocopy of student ID) needs to be provided when registering.
- Retired Members: The retired member rate is only available to dentists who no longer practice and hold a current retired membership with the ADAVB.
- Staff: The staff rate applies to dental hygienists, dental therapists and practice management staff employed by an ADAVB member and who are accompanying the member to an event. The member’s name and ADAVB membership number must be provided on their registration form.
- Dental Assistants: The dental assistant's rate applies to dental assistants employed by an ADAVB member and who are accompanying the member to an event (except for events specifically organised for dental assistants). The attendance of dental assistants is limited to large venue events and others only where stipulated. The members' name and ADAVB membership number must be provided on the registration form.
- Non-Member: Non Member dentists, including those that are employed by current ADAVB members, are not eligible for staff or member rates under any circumstances.

PAYMENT OF COURSE FEES
- All registrations must be accompanied by payment which can be made via mail or fax with credit card details clearly written on the registration form (only Amex, Mastercard and Visa are accepted), or cheques made payable to “ADAVB Inc” and mailed to ADAVB, PO Box 9015, South Yarra VIC 3141.
- Phone registrations and payments will not be accepted.
- Once full payment of the registration fees has been received and your registration processed, a confirmation letter and receipt will be mailed to you.
- The fees include your registration, handouts and course materials (if any), meals and refreshments during the day.
- Early registration is recommended for programs with a limited enrolment.
- Contact the ADAVB if confirmation of your enrolment is not received within 7 days of your initial application.

GST
- All course fees include 10% GST.
- All receipts show ADAVB’s ABN 80 263 088 594.

CANCELLATIONS
- Lectures: Cancellations received up to 7 working days prior to the event date will be refunded, less a $50 per person administration fee. No refunds will be issued for cancellations made less than 7 working days prior to the event.
- Hands-On Workshops: Cancellations received up to 14 working days prior to the event date will be refunded, less a $50 per person administration fee. No refunds will be issued for cancellations made less than 14 working days prior to the event.
- Hands-On Workshops: Cancellations made less than 7 working days prior to the event will be refunded, less a $50 per person administration fee.
- A substitute delegate may be nominated and ADAVB must be informed of the substitute’s details.
- All cancellations must be made in writing to the ADAVB.
- Refunds will be issued via cheque. Please allow up to 14 working days for refunds to be processed.

CREDITS:
- Credits will be issued if ADAVB are advised at least 3 working days prior to the event date.
- No administration fee is charged for credits.
- Credits are valid for 12 months from the date of the event.

ATTENDANCE CERTIFICATES
- Attendance at recognised programs conducted by the ADAVB contributes towards compliance with the Dental Board of Australia’s Guidelines on CPD.
- An attendance certificate, stating CPD hours, will be issued and mailed to each participant within 4 weeks of the event.
- CPD hours are awarded according to the amount of time actually spent in attendance at the event; as recorded by the ADAVB.

VENUES FOR 2011
- Various venues will be used throughout the year.
- Check individual events for venue information.

PARKING FACILITIES
- Parking facilities vary depending on the venue of the program.
- Whilst ADAVB tries its best to find venues with adequate parking facilities, available parking cannot be guaranteed.
- ADAVB encourages all participants to arrive early to avoid any potential parking problems.
- Most venues are easily accessible via public transport.

CATERING
- Catering will be provided for each course.
- Full day courses (e.g. 9.00am – 5.00pm) will have morning and afternoon tea and lunch provided.
- Half-day courses (either morning, afternoon or evening) will have light refreshments provided, unless otherwise stated.
- Vegetarian, Halal and Kosher meals are available on request and must be specified on the application form.
- While ADAVB tries to accommodate specific dietary needs, it cannot guarantee that the requests can be met. Call the ADAVB if in doubt.

ADAVB’S CALENDAR OF EVENTS FOR 2011
- For updates on the latest ADAVB seminars, workshops and group activities, log onto www.adavb.net or check the ADAVB monthly newsletter or CPD Event Update email.

PRIVACY STATEMENT
- ADAVB is bound by the Privacy Amendment (Private Sector) Act 2000. The information provided by you will be used to register you for CPD programs. If you do not wish for you details to be accessed by the individual sponsors (where applicable) please tick the appropriate box on the registration form.
