Relative Analgesia Workshop

Brief
The objective of the course is to enable participants to become proficient and confident in the administration of nitrous oxide in clinical practice. This course is approved by the Australian Society of Dental Anaesthesiology and provides an efficient introduction to dental relative analgesia. The course is also an excellent refresher for dentists wishing to update their theory and practical skills in the delivery of relative analgesia. Participants will be given the opportunity to administer nitrous oxide-oxygen sedation to each other, and to experience themselves the effects of the gases in a safe environment.

Topics
- What are the current legal requirements to use RA?
- Why did RA cease being used in practices & the machines ultimately end up in the corner?
- Why use RA over oral sedation?
- How to use RA properly.
- New brochure launch for surgeries.
- The Dental Board’s opinion.
- Sedation on a whole.

Presenters

Dr Greg Mahoney (QLD)
Dr Greg Mahoney has over 30 years’ experience in dentistry and holds a number of key positions in prominent dental associations. He is the Australia Asia Pacific Representative for the International Federation of Dental Anaesthesiology Societies and President of the Australian Society of Dental Anaesthesiology (ASDA). Greg has a fulltime private practice in Brisbane dealing with the anxious patient and has been involved in sedation research for the past 14 years.

Dr Robert Turnbull (SYD)
Dr Turnbull had 15 year General Dentistry experience where he routinely used Nitrous Oxide Relative Analgesia to great effect on his anxious patients and for uncomfortable procedures both in the Military and private general practice. Dr Turnbull brings valuable experience in successfully establishing and operating RA facilities in your environment and managing the complications which may arise while in use.
