

ADAVB and
Mayfield Education
present
**Infection Control
Workshops for
Dental Assistants**

Enrol for these highly informative sessions and
implement the practical information at work immediately.

2009 Dates | Friday 15 May | Friday 19 June | Friday 24 July | Friday 28 August
Held at ADAVB Training Rooms Level 3, 10 Yarra Street South Yarra Victoria

Proudly supported by:

temp fillings
dental personnel

“I attend infection control seminars with my employer but most of the information is far too academic and aimed at dentists. In my line of work I need practical information on infection control that is relevant to me.”

– Sarah, Dental Assistant

Sounds familiar? This is a recurring dilemma faced by many dental assistants and their employers where practical information on infection control protocols is scarce for the team.

While it is the dentist's responsibility to ensure the practice has effective infection control protocols and procedures, it is equally important for dental assistants to be well versed in this challenging area as they are often the ones responsible for implementing systems.

With this in mind, the ADAVB is proud to be working in partnership with Mayfield Education to deliver a series of Infection Control workshops that have been specifically tailored to the needs of dental assistants.

Mayfield Education is Victoria's leading staff education and training centre for the health and community services sector. For over 45 years, Mayfield has provided health and community services training programs, courses and services that equip people with practical, work related skills. Their vast experience includes the development and delivery of specific health training certificate level and short courses in specialist areas such as sterilisation, infection control, health management, allied health, nursing and aged care.

Mayfield uses adult learning principles and recognises individual learning styles to deliver training in a flexible manner incorporating a variety of interactive methods. This program employs methods such as: demonstrations; case studies; group discussion facilitation; role-plays; structured individual exercises and trainer presentations.

Your trainer

Susan Cornish, *BAppSci.,(MLS), BA, Master of Advanced Practice (Infection Control)., GradDipT&D., GradDip EOAdmin., Cert IV TAA, MASM*

Susan is currently Consultant, Course Coordinator and Lecturer in Infection Control and Sterilisation at Mayfield Education. She has a background in microbiology and has completed a Master of Advanced Practice (Infection Control) from Griffith University. Susan has considerable experience in teaching microbiology, infection control and sterilisation over the past decade including dental, medical and nursing students, aged care facilities and other healthcare organisations. She has completed infection control and sterilisation audits within both the private and public health care sector.

Module 1 – Staff Health **Friday 15 May 2009**

Blood borne viruses and the healthcare worker

- Transmission modes in dentistry
- Risk factors for transmission
- Appropriate steps in blood and body fluid (BBF) exposure management
- Estimated risks of developing an infection post BBF exposure

Staff health programs

- Infections that pose a risk to dental staff
- Protection against development of infection
- Staff health programs that address staff protection against occupational infections

Module 2 – Infection Control **Friday 19 June 2009**

Transmission and prevention of infection

- The modes of transmission of infectious diseases
- The methods of infection transmission prevention
- Standard precautions and their application in dentistry
- Additional precautions and their application in the dental setting

Environmental infection control

- Environmental infection control issues in dentistry
- Use of barriers
- Cleaning and disinfection of the patient area
- Application of cleaning and disinfection of BBF spills

Module 3 – Sterilisation **Friday 24 July 2009**

Principles of steam sterilisation

- Properties of steam
- Application of steam as a sterilising agent
- Quality of steam
- AS4815 requirements for calibration of steam sterilisers

Monitoring and Validation

- Monitoring the sterilisation process as required by AS4815
- Validation of the sterilisation process as required by AS4815
- Quality requirements outlined in AS4815

Module 4 – Cleaning and Packing of Instruments **Friday 28 August 2009**

Cleaning dental and surgical instruments

- Care of dental instruments
- Cleaning processes of instruments both manual and mechanical
- Monitoring of the cleaning process

Principles of ultrasonic cleaning

- AS4815 requirements for testing ultrasonic cleaners
- Correct packing methods for instruments
- Monitoring of the packing and loading process for steam sterilisation
- Tracking systems for sterilised instruments

ADAVB and Mayfield Education reserve the right to alter program details as circumstances require.
